

Patient Process

Being admitted to an inpatient facility can be intimidating, but our staff is here to ease the transition and make patients comfortable upon admission and during their stay. Our team of experienced clinicians will guide you through every phase of treatment. Here's what patients can expect at NeuLife.

Step 1 – Prior to Admission:

- Patient and family visit the NeuLife campus for a tour
- A pre-admission evaluation is performed by a Clinical Nurse Liaison.

Step 2 – Upon Admission:

- A welcome orientation is held for the patient and the family
- The NeuLife clinical team reviews the patient's medical history and conducts the initial evaluation.
- The team works with the patient and family to establish discharge goals and target discharge date (may be subject to change).
- The customized daily therapy and treatment schedule is developed.

Step 3 – During Your Stay:

- An interdisciplinary team conference is held weekly to review progress and challenges for each patient and treatment plans and goals are adjusted accordingly.
- The NeuLife Case Manager will update family members, payers and other providers with any plan adjustments.
- As goals are reached, patients may have the opportunity to go home with a caregiver for a day and/or overnight visit.

Step 4 – Discharge:

- As the anticipated discharge date approaches, the NeuLife team will make recommendations and arrangements regarding medical equipment, home and environmental considerations and follow-up appointments.
- On discharge day, the team will meet with the patient and family to answer any questions.
- Follow-up phone calls are made within a week after discharge and again at 30-days and 90-days. The team is available anytime via phone for questions once the patient returns home.

Community Integrated Rehabilitation

Our Community Integrated Rehabilitation program is a hallmark of our functional approach towards rehabilitation. The NeuLife team embraces the philosophy that each individual, regardless of disability, has the potential to live a meaningful life in the community. Significant emphasis is placed on facilitating community re-entry, with hands-on and real-life therapeutic opportunities to bridge rehabilitation to reality. This unique program will provide patients and families with the opportunity to prepare for their return home in a safe and supportive environment.
